

CASE STUDY

Funneling All Specialties through One Billing Software

Including Anesthesiology, Radiation Oncology, Radiology, & More
ImagineSoftware + Comprehensive Medical Solutions, Inc.

“ImagineSoftware has the ability to accommodate any type of billing.”

THE CLIENT

➤ Comprehensive Medical Solutions, Inc.

Comprehensive Medical Solutions, Inc. (CompMed) is a business management company, offering billing, practice management, accounting, payroll, contracting and more. CompMed takes pride in offering business solutions for all types of medical specialties – Specifically Radiology, Long Term and Palliative Care, Radiation Oncology, Anesthesiology, Podiatry, Internal Medicine/Hospitalists, TeleHealth, Pharmacy, and Audiology. Ranging in number of providers and procedure/charge volumes, CompMed serves one of the largest Nursing Home companies in the United States and continues to maintain high quality services.

“We believe in supporting our local community and that [ImagineSoftware] provides the best quality of service.”

THE CHALLENGE

➤ Maintaining high-quality services throughout multiple medical practices, specialties, and states.

CompMed works with a wide variety of specialties, filing claims across 35 states. Each specialty's unique coding and billing needs call for a configurable software solution, equipped with automation and reporting that could keep up with a multitude of demands. With this in mind, CompMed sought after a partnership with ImagineSoftware.

They discovered ImagineSoftware's billing and payment solutions, providing exactly what they were looking for:

- Automation technology
- Electronic payment posting
- Real-time analytic reports
- Robust staff training and implementation program
- Online, secure payment portal

“I feel like we are more partners than customers, [ImagineSoftware] wants us to succeed.”

CASE STUDY

Funneling All Specialties through One Billing Software

Including Anesthesiology, Radiation Oncology, Radiology, & More

ImagineSoftware + Comprehensive Medical Solutions, Inc.

THE SOLUTION

➤ Optimizing human touch and revolutionary technology for efficient workflows.

CompMed's billing team consists of all US-based Certified Coders, certified in their unique specialty. Equipping their industry experts with ImagineSoftware's billing and RCM technology has enabled CompMed to run all clients' billing through Imagine's single RCM platform.

“

"We mastered Imagine - We want to funnel all business through the Imagine RCM system."

”

Reporting: ImagineSoftware comes standard with over 200 real-time reports for gathering metrics, tracking trends, and planning for the future. In addition to this, CompMed is able to pull customized, BI-fueled data for their unique client base's requests and needs.

“

"We can run anything [our clients] can think of, which is very, very helpful for us!"

”

Patient Payments: CompMed takes pride in creating an easy, pleasant payment experience for all their clients' patients. The elimination of an automated phone system allows for all phone calls to be answered by a real person – Answering the patient's questions and even processing their payment directly through Imagine's patient payment portal.

“

"We want to make the shortest distance between the patient and their payment."

”

➤ When processing patient payments with Imagine,
“**Boom - It's easy to do!**”

Dashboards: ImagineSoftware's RCM platform work queue offers a paperless, bird's eye view of all CompMed's activities.

“

"Everyone can see what's going on. It's truly revolutionized how we work."

”

Anesthesia Billing: Amongst their unique mix of specialties, CompMed understood the importance of finding a billing solution for Anesthesiology. Anesthesia billing is notoriously complex, and increases complexity as each group bills in differently. Imagine's configurability and automation creates Anesthesia-specific "rules" for CompMed to process their Anesthesiology client's billing efficiently and effectively.

“

"We actually like [anesthesia billing], a lot of companies shy away from it because it's complicated... a lot goes into it."

”

Training & Customer Service: CompMed's level of customer service was matched with ImagineSoftware's Implementation and Client Success teams, developing more of a partnership than a vendor relationship. From collaborating to enhance existing products to developing new ones – Together, both organizations have improved one another's processes and performance.

“

"If there is ever a problem, I appreciate that I get quick attention... I have confidence in our Client Success Rep and her ability to get us answers."

”
